

Hello, my name is **Natalie
Ramirez**. I was born in
Austin, Tx and I am **Hispanic**.

Three adjectives others
might use to describe me
are passionate, driven, fun.

My favorite color is white,
my favorite animal is
Elephant, and my favorite
musician/band is Arctic
Monkeys.

In my free time I like to
watch horror films, run, and
read.

If I could go anywhere, I
would go to Greece because
it's the one place my
grandma wanted to visit
before she passed and didn't
get to.

I am most worried about
automation and robots.

I am most proud of the work
I've done at DevLeague.

My favorite thing about
myself is my intuition and
epic spotify playlists.

When I was a kid, I wanted
to be a fighter pilot.

I usually wake up at 6am,
and go to sleep by 1:30am.

I went to Providence for
high school and University of
Texas at Austin for college,
where I majored in
Information Systems
Management BUT didn't
graduate.

The most interesting topics
I've learned about are
photography and AutoCad.

Currently, I am the Director
of Technology at DevLeague.

I enrolled in this class
because I like data, I have a
background in it, and I want
take my skills to the next
level.

My experience with data
analysis **Data Analysis for
financial institutions.**

I learn best when I'm thrown
into something and forced
to learn it fast.

I am most excited about
learning about machine
learning and statistics
because I want to apply it in
my business and improve
data driven decisions.

After this class, I hope to
apply what I've learned to
improve internal operational
processes.

My dream job is to do
something that gives me
purpose.

The philosophy I live my life
by is The only thing I know is
that I know nothing.
