Hello, my name is Olina Cavedoni. I was born in Hilo and I am Chinese & Italian.

Three adjectives others might use to describe me are awkward, quiet, nice.

My favorite color is pink, my favorite animal is bunnies, and my favorite musician/band is One Direction.

In my free time I like to eat, golf, and hang out with friends.

If I could go anywhere, I would go to bed because I don't sleep enough anymore.

I am most worried about **failing**.

I am most proud of not falling asleep yet today.

My favorite thing about myself is I crack myself up sometimes.

When I was a kid, I wanted to be a mom and bake cookies.

I usually wake up at 6:30, and go to sleep by 11:30

(this is now a thing of the past)

I went to Hawaii Preparatory Academy for high school and Willamette University for college, where I majored in Economics and International Relations.

The most interesting topics I've learned about are Japanese Art History and Econometrics.

Currently, I do financial planning at Prudential Advisors, and I'm an analyst at MKThink.

I enrolled in this class because I love excel, but wanted to learn how to be a better data analyst.

My experience with data analysis pretty much limited to excel (although I am pretty good at excel).

I learn best when I don't have distractions.

I am most excited about learning about machine learning because I think its cool and I don't know anything about it.

After this class, I hope to get a good job that makes me lots of money so I can afford my expensive lifestyle.

My dream job is to be a **consultant/data analyst**.

The philosophy I live my life by is do what makes you happy.
